STORE GUIDE

Vayora Tickets — free download

How to use the downloadable version of Vayora Tickets, and what Plus and Lifetime add.

Updated October 2026

What the free download is

Vayora Tickets Free is a single file that runs in your web browser on one computer. You don't need an account, and you don't need the internet to use it. It prints the same shelf tags and promo tickets as the online version.

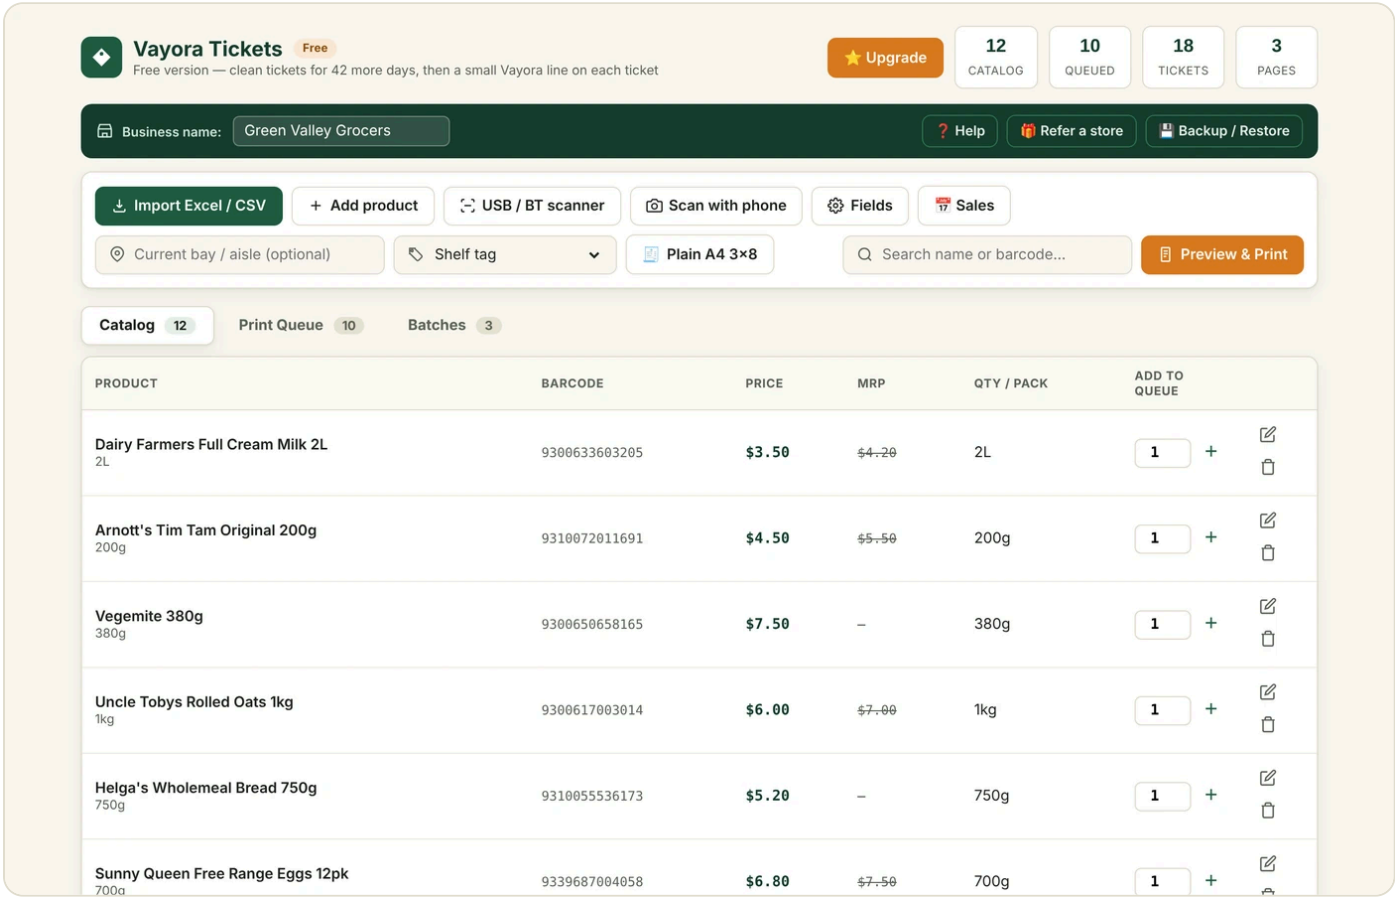

- Your products, print queue and batches are saved **on that computer only**, inside the browser. Back them up regularly (see **Backup and moving computers**).
- It's free to use for as long as you like. Tickets are clean for the first **60 days**. After that, each ticket carries a small "Printed free with Vayora Tickets · vayora.au" line.
- **Plus** (A$49/year) or **Lifetime** (A$99 once) removes that line and adds extra features.

Need several devices or staff logins? The **online version** syncs between computers and phones, with a 30-day free trial.

Download and open it

1. On vayora.au, click **Download free**. You get one file: **Vayora Tickets Free.html**.
2. Move it somewhere permanent, e.g. your **Documents** folder or Desktop.
3. Double-click it. It opens in your browser. **Google Chrome** or **Microsoft Edge** works best.
4. Type your store's name into **Business name**.

Always open the same file in the same browser. Your data is kept in that browser, so opening the file in a different browser shows an empty copy. Don't clear the browser's "site data" without exporting a backup first.

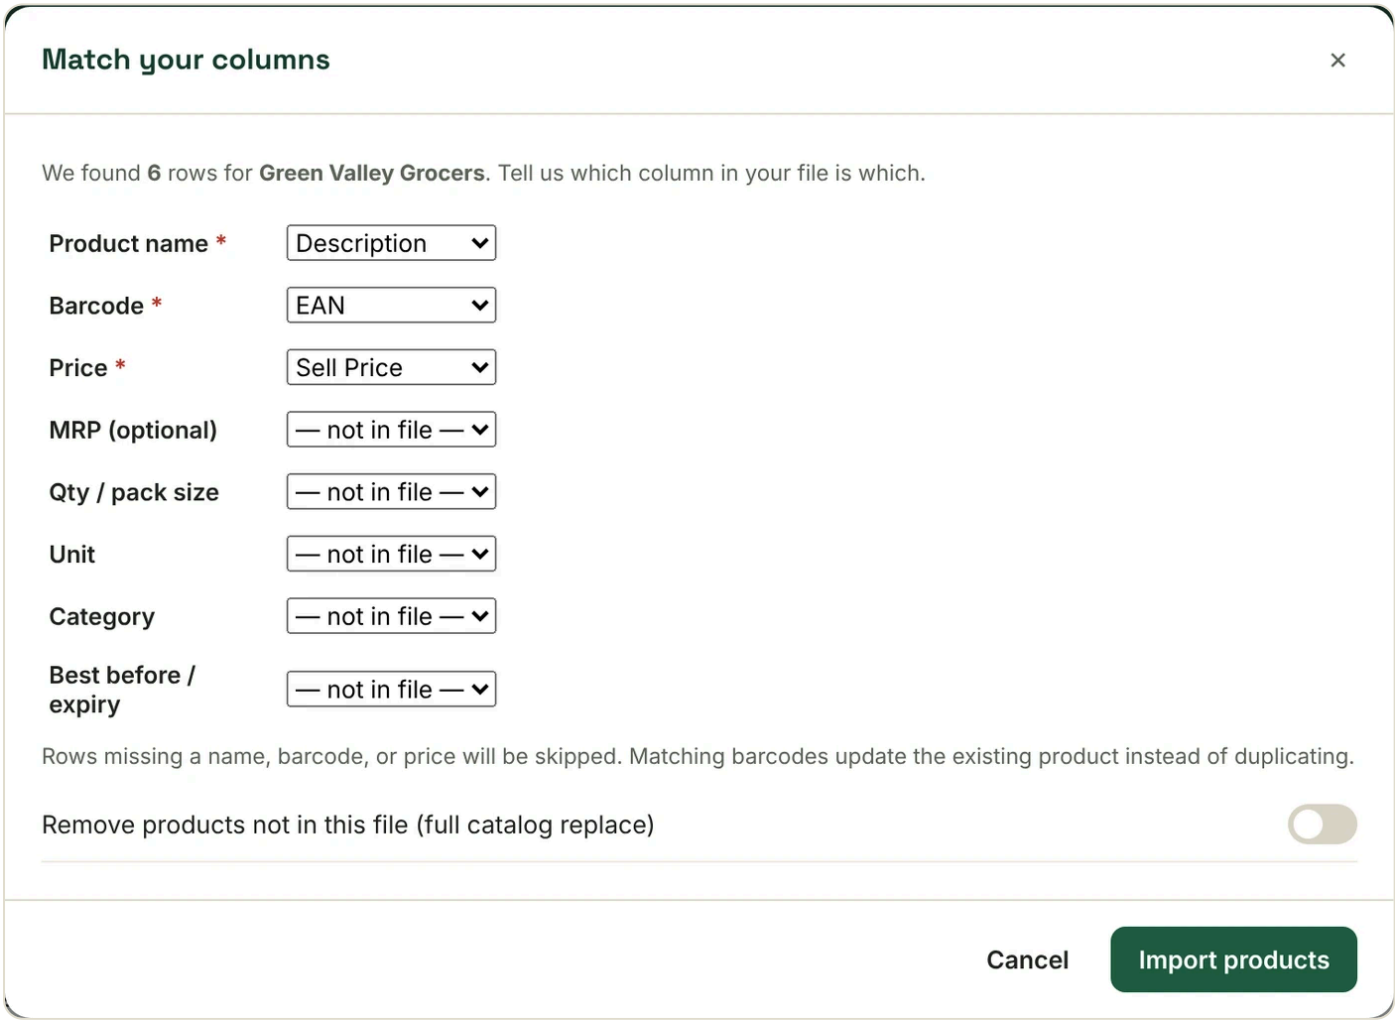

The main screen. The badge next to the name shows your plan and how many clean days are left.

Everyday use

Day-to-day use is the same as the online version. The online guide covers each step in more detail, with pictures.

TO...	DO THIS
Load products	**Import Excel / CSV** → match columns → Import products (details)
Queue tickets	Catalog +, **USB / BT scanner**, or **Scan with phone** (details)
Make a special	Choose Promo A7 / A5 / A4, then set the offer, label and dates in the Print Queue (details)
Print	**Preview & Print** → Print now → A4, scale 100% (details)
Choose your paper	🧾 **paper** button in the toolbar → pick your sheet (pre-cut, Avery labels, plain A4 or your own measurements) → print the alignment test once (details)
Reprint later	**Save as batch** → Batches (details)

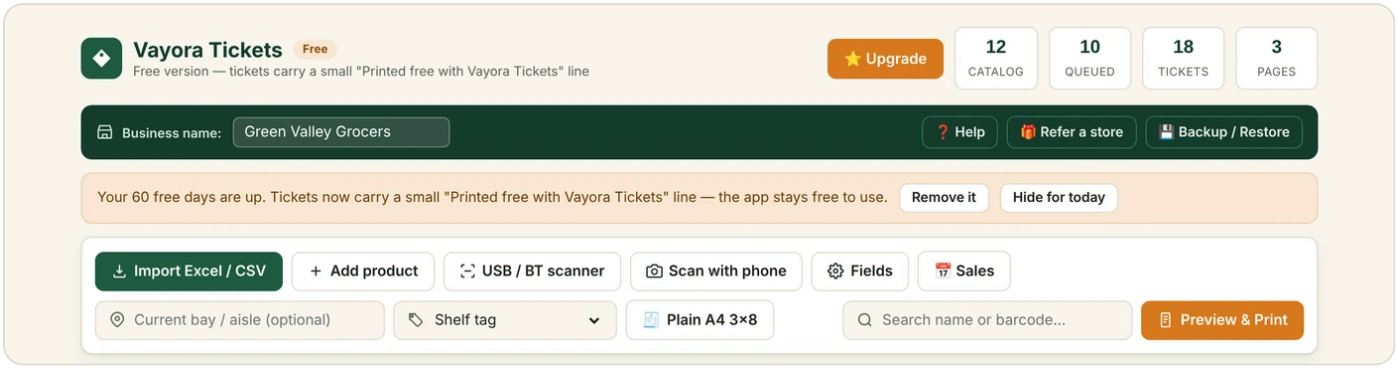

Importing works exactly as in the online version.

The 60 clean days, and after

For your first 60 days, tickets print clean. The line under the app name counts down the days. When they're up:

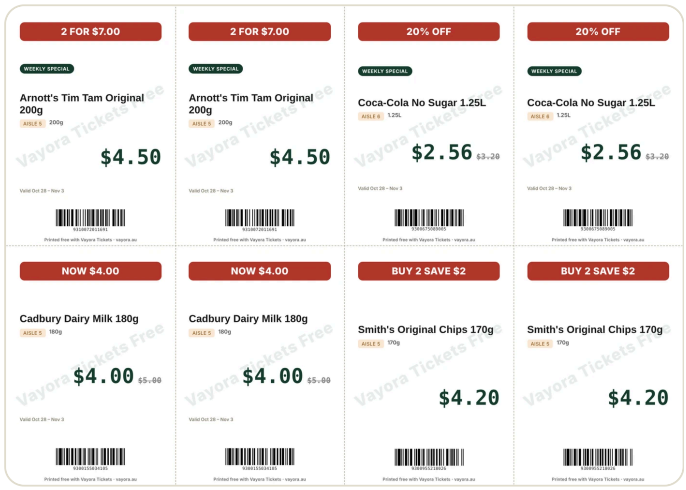

- Every ticket gets a small line at the bottom: **"Printed free with Vayora Tickets · vayora.au"**.
- Promo tickets (A7, A5, A4) also get a light diagonal "Vayora Tickets Free" mark.
- Everything else keeps working. Nothing is locked or deleted.

After 60 days a banner explains the change. "Hide for today" hides it.

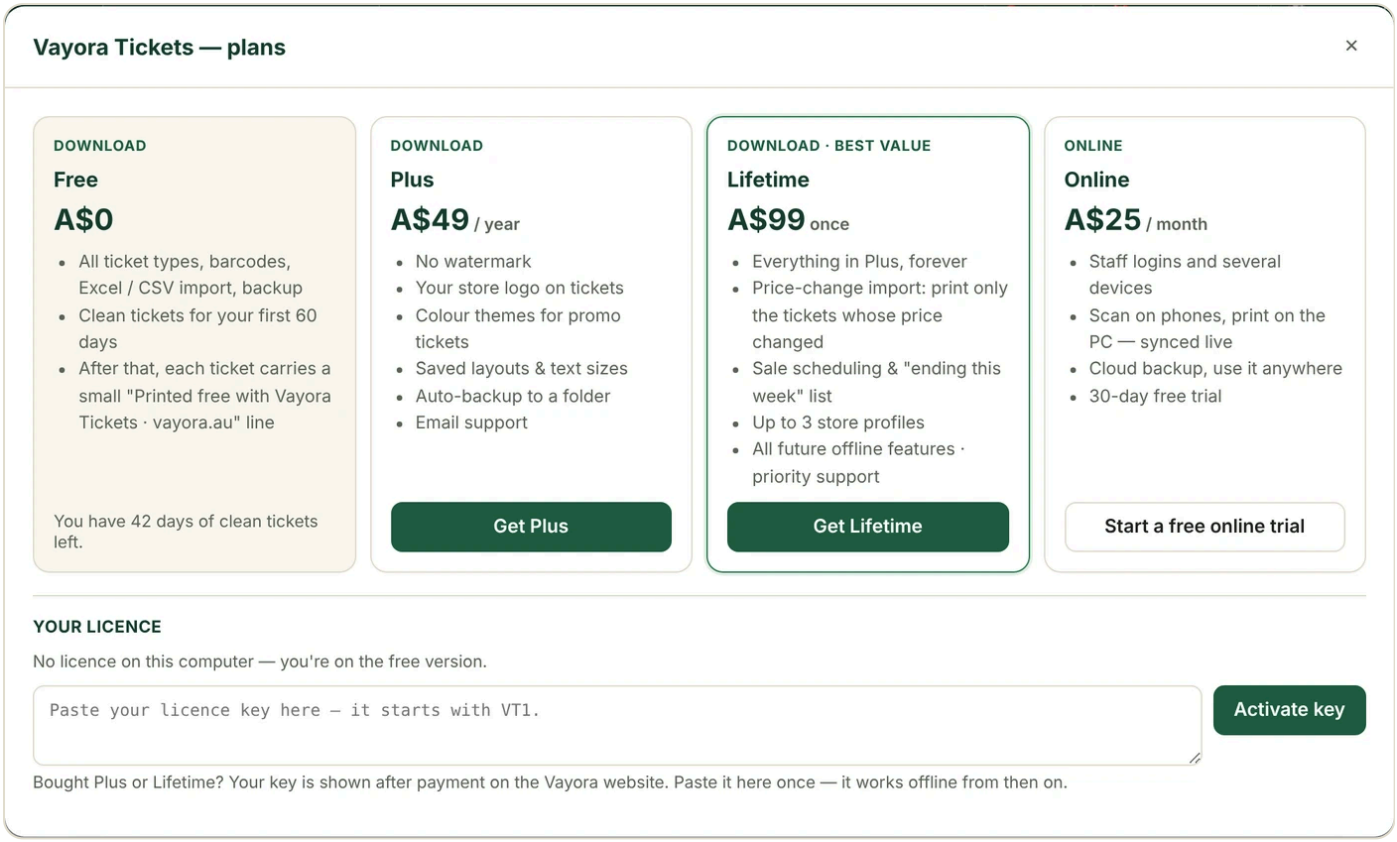

Shelf tag with the small Vayora line.

Promo tickets also get the light diagonal mark.

Plus and Lifetime

Click ⭐ Upgrade (top right) to see the plans.

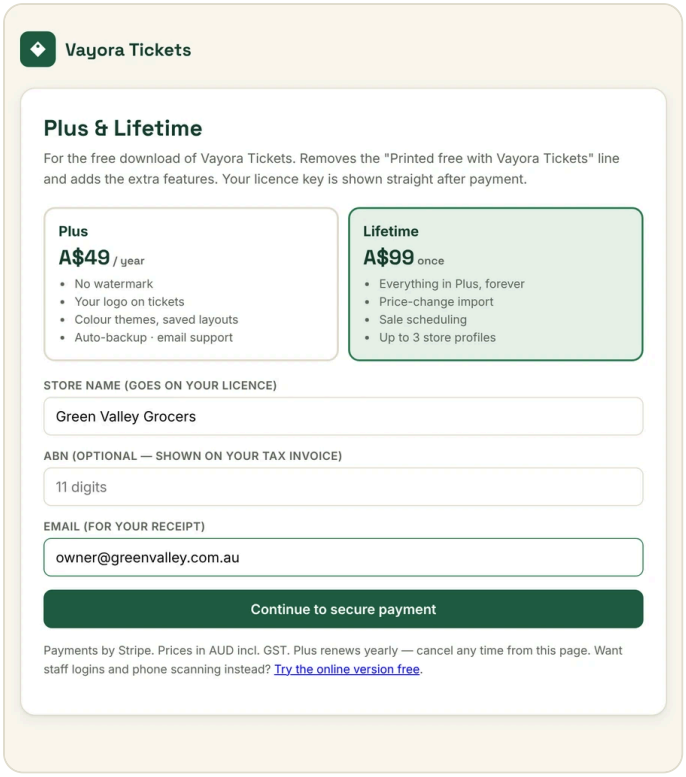

The plans, and where you paste your licence key.

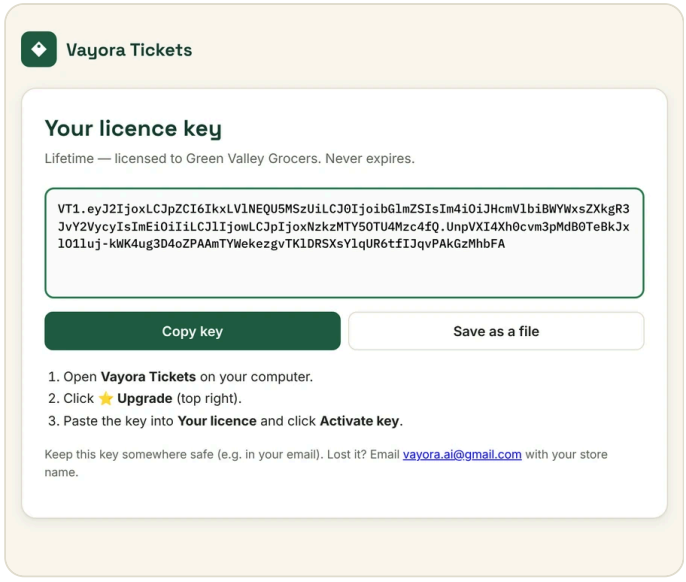

PLAN	PRICE	WHAT YOU GET
Free	A$0	Everything for printing; the Vayora line after 60 days
Plus	A$49 / year	No watermark, your logo on tickets, colour themes, text sizes and saved layouts, auto-backup to a folder, email support
Lifetime	A$99 once	Everything in Plus forever, plus price-change import, sales calendar, up to 3 store profiles, priority support

Buying and activating a licence

1. Click **Get Plus** or **Get Lifetime**. The Vayora licence page opens in your browser (this step needs the internet).
2. Check your store name (it goes on your licence), add your email for the receipt, and click **Continue to secure payment**. Pay on Stripe's secure page.
3. Your **licence key** is shown straight after payment. Click **Copy key**, and keep a copy, e.g. with **Save as a file** or in your email.
4. Back in the app, click ⭐ **Upgrade**, paste the key under **Your licence** and click **Activate key**.

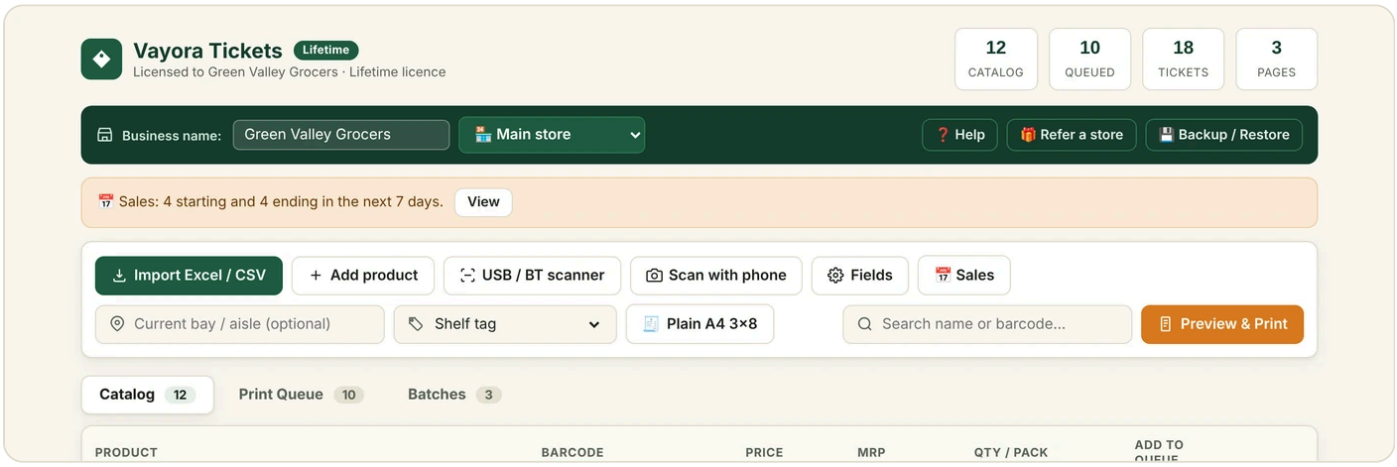

The licence page: choose Plus or Lifetime.

Your key appears straight after payment.

Paste the key and click Activate key.

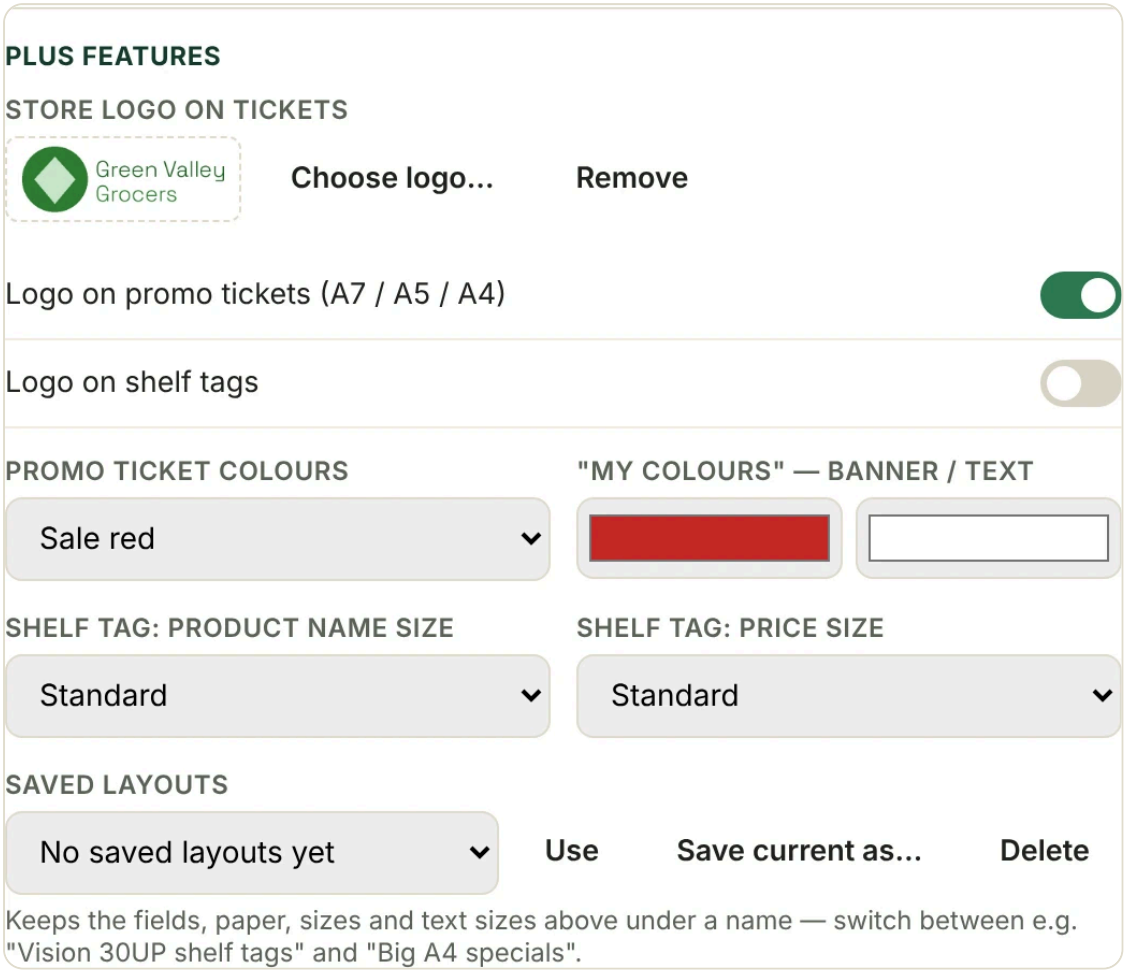

Done: the badge says Lifetime, and the extra features are unlocked.

Plus renews yearly. Stripe charges your card each year, and you can cancel any time. When your key is close to its date, the app shows **Renew key**. One click gets your updated key. To see invoices or cancel, click the plan badge, then **Invoices & billing**.

To manage your licence later, click the **Plus** or **Lifetime** badge next to the app name. You can refresh the key, open invoices and billing, or remove it from this computer.

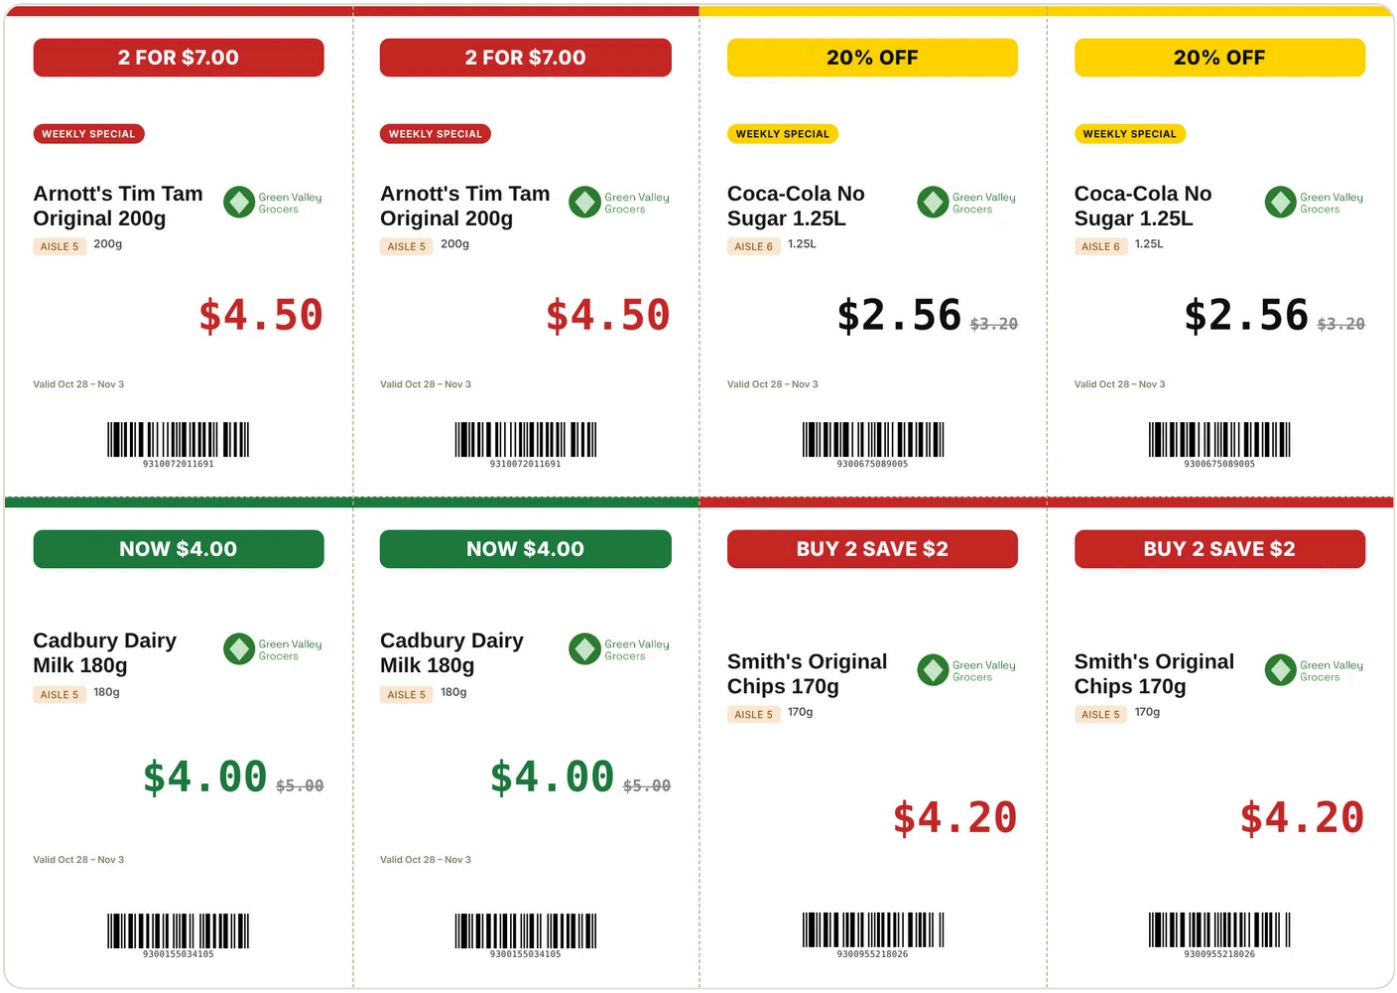

Plus features

These are in `Fields`, under **Plus features**.

Logo, ticket colours, text sizes and saved layouts.

- **Store logo:** click `Choose logo...` and pick a PNG or JPG. It prints in the corner of promo tickets, and on shelf tags too if you switch that on.
- **Promo ticket colours:** Standard, Sale red, Clearance yellow, Special green, Blue, or **My colours**. Set a default here, or choose per ticket in the Print Queue (**Colour** under the promo details).
- **Shelf tag text sizes:** make product names or prices bigger or smaller.
- **Saved layouts:** save your fields, paper and sizes under a name (e.g. "Vision 30UP shelf tags") and switch with `Use`.

Promo A7 tickets with a store logo and the Sale red, Clearance yellow and Special green colours.

Auto-backup to a folder

In 💾 **Backup / Restore**, click **Choose backup folder...** and pick a folder, ideally a USB stick or a OneDrive / Google Drive folder. A backup file is then saved there automatically after every change, one per day, kept for 30 days. Your browser asks for permission again after a restart: click **Resume auto-backup** on the banner. This needs Chrome or Edge.

Backup / Restore

Everything in this app lives only on this device's browser storage — there's no cloud copy. If this browser's data is ever cleared, or this device is lost, everything is gone unless you've exported a backup file first. Export regularly.

Export backup (.json)

Saves your full catalog, print queue, batches, and settings to a file you keep — Google Drive, a USB stick, wherever you'd trust with the only copy.

AUTO-BACKUP TO A FOLDER

Off. Choose a folder (e.g. a USB stick or OneDrive folder) and a backup is saved there automatically after every change.

Choose backup folder...

MOVING TO THE ONLINE VERSION?

Export catalog (Excel)

Then use "Import Excel / CSV" in the online version — the columns match automatically.

RESTORE FROM A BACKUP FILE

Choose backup file to restore

Replaces everything currently on this device with what's in the file. Use this to move to a new device, or recover after a problem.

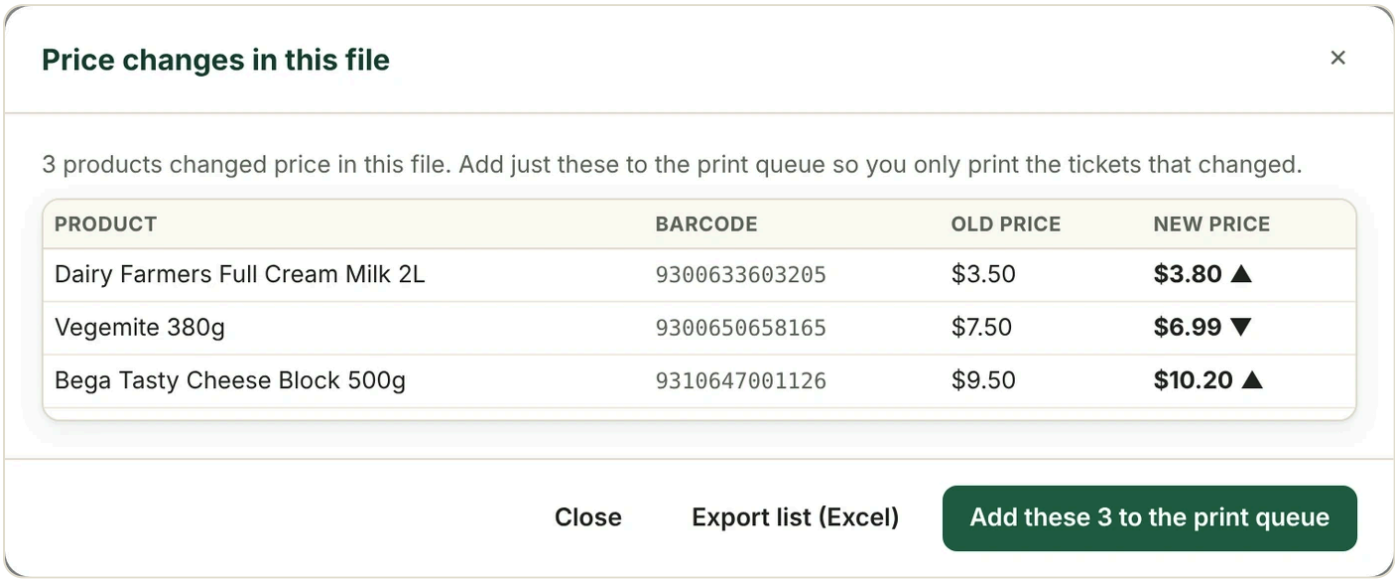

DANGER ZONE

Erase everything on this device

Lifetime features

Price-change import

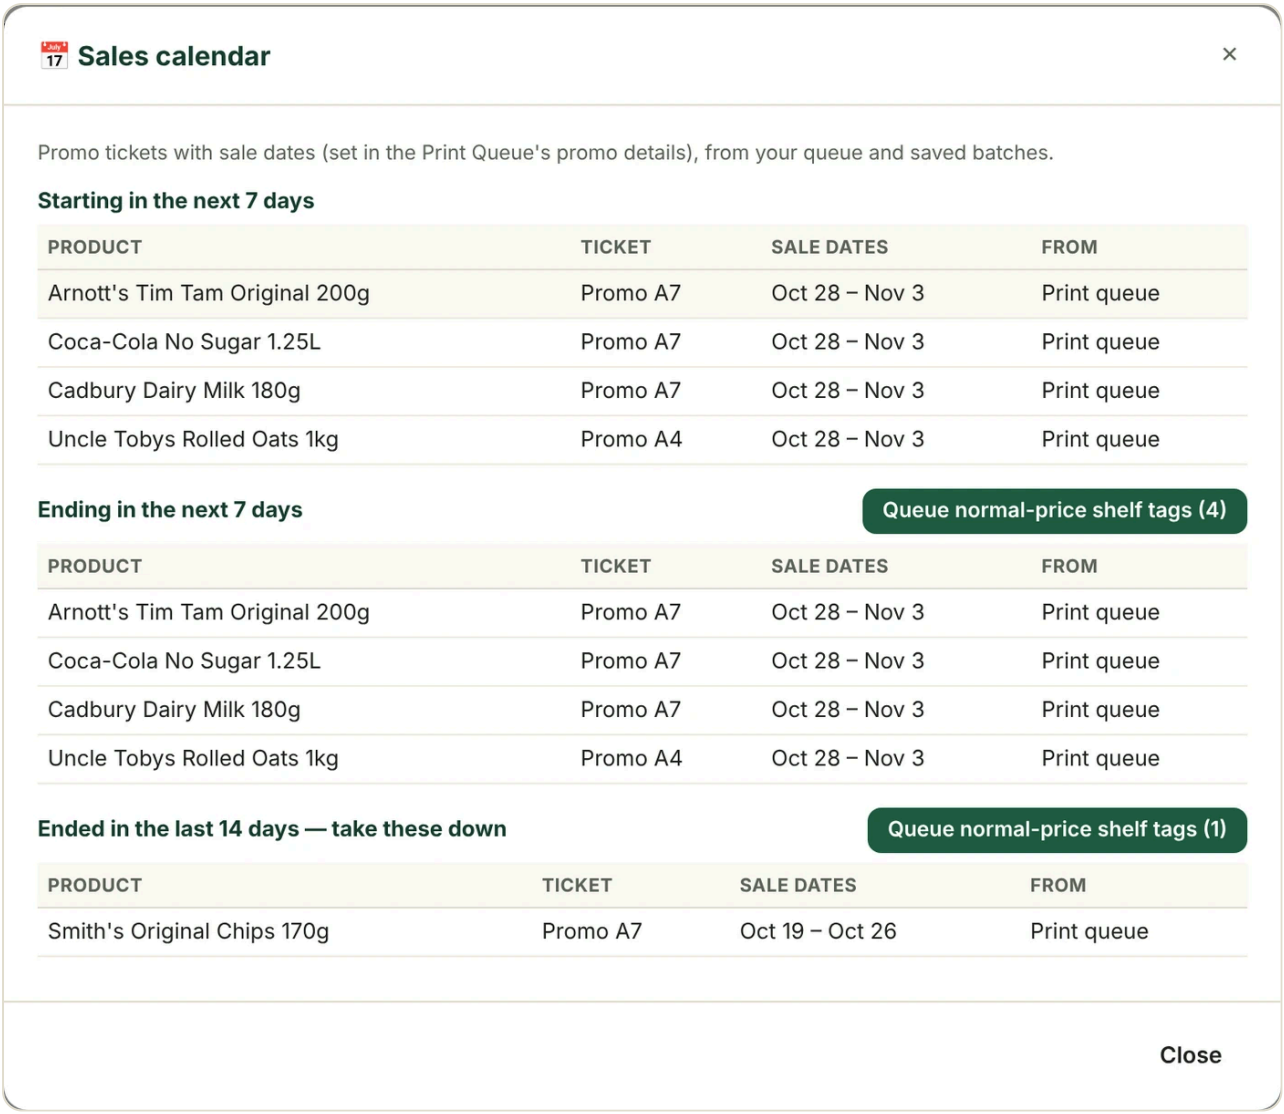

When you import a new price file, the app lists every product whose price changed. Click **Add these to the print queue** to print only those tickets. You don't have to hunt through the catalog.

After importing a price file: only the 3 changed products, with old and new prices.

Sales calendar

Click **Sales** to see promo tickets (from your queue and saved batches) that **start** or **end** in the next 7 days, and sales that have **ended**. One click queues normal-price shelf tags for ended sales, so the old specials come down on time. A banner reminds you when sales are starting or ending.

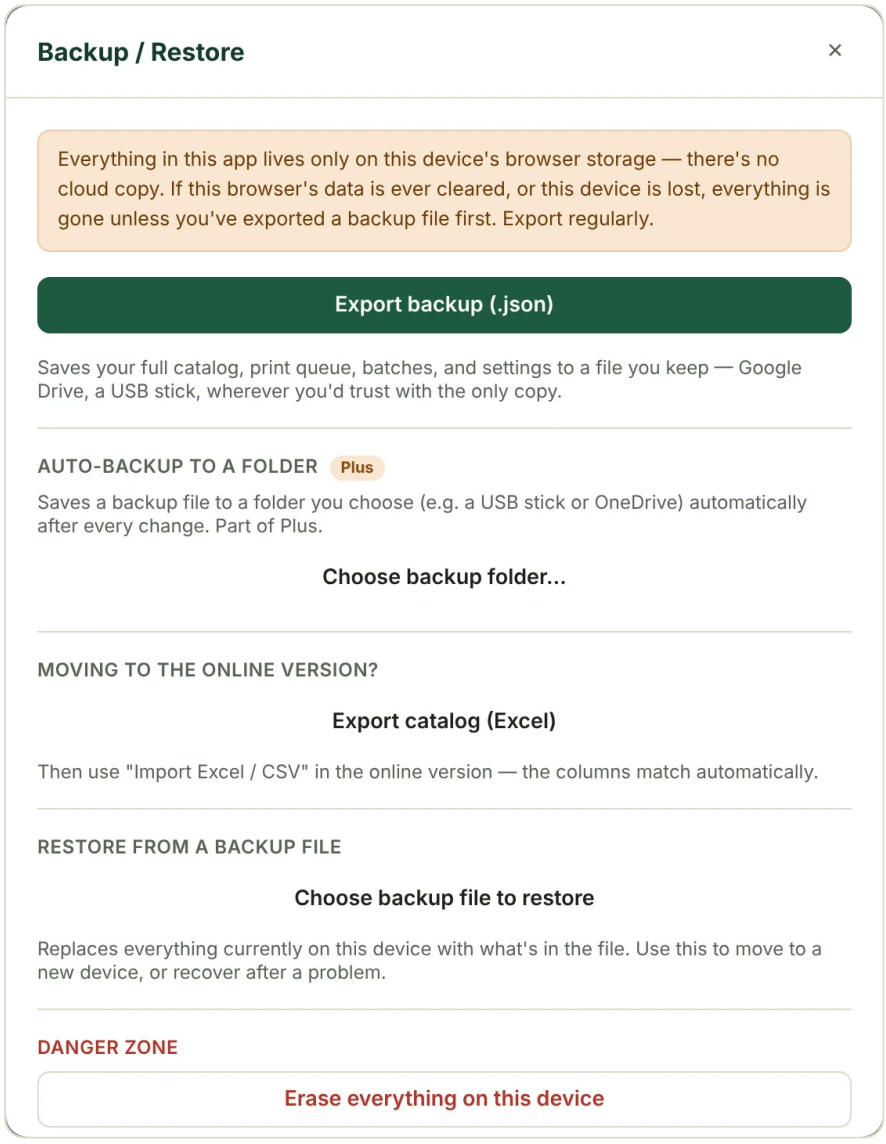

Up to 3 store profiles

Run more than one shop? Use the store menu in the green bar and choose **+ Add a store…**. Each store has its own catalog, queue, batches, settings and logo. Switch between them from the same menu.

Backup and moving computers

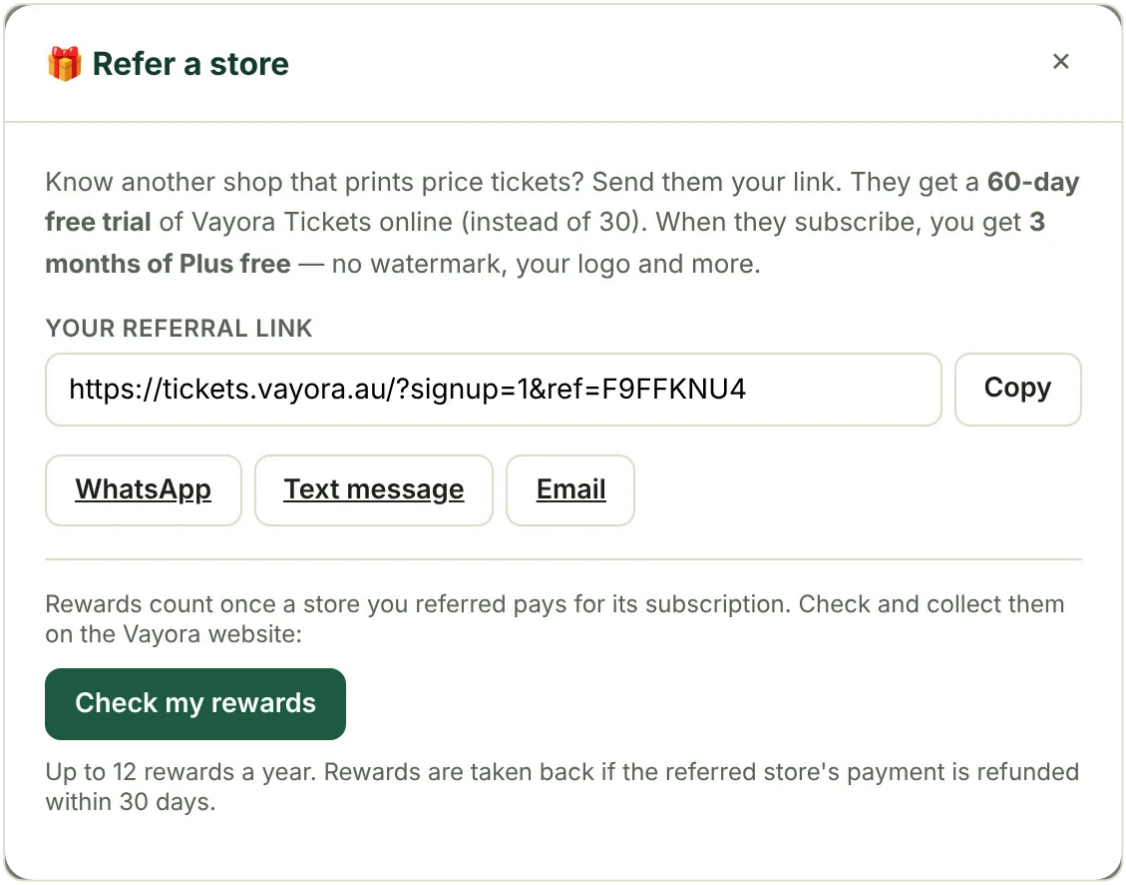

Because everything is saved on this computer only, a backup file is your safety net.

- **Export backup (.json)** saves everything (products, queue, batches, settings) **and your licence** into one file. Do this weekly, or turn on auto-backup with Plus.
- **New computer:** copy the app file and your latest backup across. Open the app, go to Backup / Restore and choose **Choose backup file to restore**. Your data and licence come with it.
- Backups contain your licence key, so keep them private.
- **Export catalog (Excel)** exports just your products, ready to import into the online version.

Refer a store

Click 🎁 Refer a store and send your link to another shop. They get a **60-day** free trial of the online version. When they subscribe, you get **3 months of Plus free**, or 3 more months if you already have Plus. Click Check my rewards to collect them; the reward comes as a licence key to paste in.

Moving to the online version

1. In **💾 Backup / Restore**, click **Export catalog (Excel)**.
2. Start a free trial at **tickets.vayora.au** (see the **online guide**).
3. In the online version, use **Import Excel / CSV** with that file. The columns match automatically.

Troubleshooting

My products have disappeared

Make sure you've opened the same file in the same browser as before. If the browser's data was cleared, restore your latest backup from Backup / Restore.

"That key isn't valid"

Copy the whole key. It starts with **VT1.** and is quite long. Paste it without adding anything. If you saved it as a file, open the file and copy the key line.

My Plus licence says it ran out

Once your yearly payment has gone through, click **Renew key** on the banner (or click the badge → Renew / refresh key) to get your updated key, then paste it in.

The buttons for Plus or Lifetime don't open anything

Buying, renewing and collecting rewards open the Vayora website, so you need an internet connection for those steps. Everything else works offline.

Barcodes won't scan at the register

Print at **100% / Default** scale, not "Fit to page".

Still stuck? Email **vayora.ai@gmail.com**. Plus and Lifetime customers get priority.
